Novembre 2026: 50,000 words

1,667 words a day. Every evening write in the box how many words you have in total.

One day at a time. One word after another.

Falling behind?

Don't try to catch up in one night. Divide the words you have left by the days remaining: that is your new daily goal.

Example: on November 15 you are at 20,000. You have 30,000 words left in 15 days, so 2,000 a day.

October: preparation

Take all non-writing decisions out of November.

Decide today, write freely in November.

Before November 1st

- [ ] I wrote the premise in two sentences
- [ ] I gave each main character a name, a desire, and a fear
- [ ] I have a list of 30 scenes, one for each day
- [ ] I chose a fixed time to write, the same every day
- [ ] I measured how many words I write in 30 minutes

In 30 minutes I write about _____ words, so I need _____ minutes a day.

Small choices, big stories

The premise

Who wants what, and what stands in their way.
